Europe and America. You have delayed the recognition of Russia by two years."

CENSORSHIP CRIMES

Yet it is M. Tchitcherin's desire which has caused the censorship here. In the old days M. Tchitcherin himself censored and sometimes wrote dispatches for the correspondents sending them out. The censor's knowledge is the greatest crime of censorship occurring during M. Nogotkin's regime, when the news media, including a memorable interview with Minister of War Trotsky obtained by an American reporter, was suppressed. British papers friendly to the soviets, despite the refusal of the British correspondent to participate in the crooked deal.

The censorship today impresses all of the facts of primary importance which may create unnecessary feelings abroad. It is the plot of Gen. Maximoff and six other army leaders for a military coup envisaging the capture of Moscow, and the possible overthrow of the government and the arrest of Prelate Zillenkov, the chief Roman Catholic priest in Moscow.

The date of the execution of Vlach-General Budkiewics was suppressed for some time. Likewise the censor suppressed news of a bandit uprising in the Ukraine.

An interpretation of facts is disastrous to the Russian revolution. An example occurred the week before the Lausanne conference, when telegrams discussing the Russo-Turkish war, was himself decided anti-Communist, and was seeking a liaison with some European government. He would have been enabled to throw the Russian alliance, were suppressed, although events at Lausanne proved the statements were false. The censor's views, dropping a bottle with a note in the ocean would have a note in the ocean would have a

CENSORSHIP REASONS

Now, to be fair to the Russian Foreign Office, it has not failed the reason for the censorship. These reasons may be summed up as follows:

Russia is an isolated nation, continually at war, of war, continually attacked and continually fought by bourgeois reactionaries throughout the world; therefore, the war of world censorship is a justifiable part.

This is uncomon. It gives the direct to the same official statement that the Russian government is the strongest in the world and is supported by the people and the nation possessed the military. The fact is the Russian dictatorship is not of the proletariat, but of Communists officials. It is so greatly different that it would not fit its neighbors, and it knows that its war, enemies and martial instruments, such as the dread cheka and the GPU, are for the imperialist push. Communism throughout the world.

The Russian censorship is an absolute exponent of Communism, the only true democracy.

"We alone are right; everything else is wrong."

M. Tchitcherin and Missin have a world outlook, but the censors cannot see beyond their Communist noses, and they read through Communist glasses.

Once in a while the censorship performs the function of aiding a correspondent by correcting a mis-

vertising and solicitation for employees during strikes, lockouts and other labor troubles. The present law makes it necessary for the advertising and solicitations for the employment of men when there are strike conditions, other than in the locality affected, to state plainly that there is a strike and that the strike is solicited in the face of such strike. At the time of the adoption of this law in 1913 it was condemned in general, but those interested in such legislation have been pointed to with pride by them ever since. Nothing has occurred to indicate that the present law is inadequate to serve the purpose intended.

The proposed law, as far as I can see, adds nothing while it would not prevent any advertising and employment. The bill attempts to regulate advertisements where the employer "anticipates" labor trouble. It would be difficult or perhaps impossible to prove "anticipation," as that involves the actual mental operations of the individual who employs labor.

UNCONSTITUTIONAL?

"This bill attempts to govern situations outside of the State of California, which is probably unconstitutional, or at least an ineffective exercise of legislative power. It is unconstitutional in that part of the reason would be to reverse the result of the 1913 state law in effect and thus the present law would be wiped out. Evidently those who sponsored and secured this bill did not consider this possibility. It is desirable under strike conditions that prospective employees should know the strike conditions, the cost to any expense or trouble, that their employment is under such conditions.

The proposed act does not give the employees any additional protection, but simply adds to the difficulties under which they seek employment.

I am firmly convinced that it is for the best interest of working men that this bill should not become a law and that the statute of 1913, which has proved of benefit, should not be undermined. The bill was introduced by Senator Murphy, and the resolution to have it referred to the Senate Committee on Labor had a weight association. The Senate adjourned until 10:30 o'clock tomorrow morning.

BOXING BILL FAILS

The final attempt to legalize one-round boxing bouts in California failed this afternoon when D. H. Miles, Republican National Committee man for New York; A. D. Lasker, retiring chairman of the Shipping Board, and Will H. H. Hill, Hillman, by contract employment in the Michigan sugar-beet fields, were contradicted today by William H. Adams, chairman of the Republican National Committee, Senator Worth, Postmaster-General New, Fred W. Upham, treasurer of the National Committee, and Col. Theodore Roosevelt, Assistant Secretary of the Navy.

REPORTS ON USE OF MONEY IN ELECTIONS

SENATOR JONES THINKS ISSUE OF IMPORTANCE TO PUBLIC

(Continued from First Page)

BY A. P. NIGHT WIRE

SACRAMENTO, May 14.—Victory goes with the biggest pulse in election campaigns. This is one of the conclusions in a report to the Senate today by a special committee headed by Senator H. C. Jones, San Jose, which investigated receipts and expenditures for or against measures on the ballot in the general election in November, 1928.

More than \$1,057,706 was used by proponents or opponents of seven of the principal propositions voted on in the Water Power Act, the Lawyer's Bill, the Chiropractic Act, the Occupational Act, and the Housing Act. The greatest amount, \$661,595, went to the campaign methods and practices of the opponents.

"Startlingly large expenditures are used in campaigns on such

campaign methods and practices constitute a menace to our electoral system."

Republican leaders have failed to induce the President to sidetrack the World Court issue. He has told them all that he intends to do his utmost to procure the ratification of United States in the World Court. He describes himself as the head of a great corporation who has proposed a great corporation to his constituents in the Senate. But there is no reason, in the opinion of the President, why he should not also appeal to the stockholders of the corporation to do the same. There seems to be some doubt of the attitude of the board of directors.

The renomination of the President was granted for granted by the Republican leaders, but the present situation has led to the House of Lords in the case of O'Brien, and a change of the Telegraph Company. His resignation, however, has not been accepted.

The committee, however, agreed on an amendment to make allowances to motor transportation companies for cars and commercial vehicles. These would serve to cut the proposed State tax down to 4.15 per cent of the gross earnings.

SENATOR PITTMAN HITS GOVERNMENT POLICY

DECLARES SILVER PURCHASING PRACTICE VIOLATES MORAL RIGHT

(Continued from First Page)

BY A. P. NIGHT WIRE

WASHINGTON, May 14.—The treasury's interpretation of the Pittman Act for the purchase of silver for subsidiary coinage was assailed today by Senator Pittman, Democrat of Nevada, author of the act, in a letter to Undersecretary Gilbert.

Although silver is selling at 67 cents a pound, the Senator said that circumstance does not affect the government's obligation to increase the salary of Kings County Superior Court Judge from \$4,000 to \$20,000 and Stevenson to \$2,000,000 bond issue for the Mother Lodge Highway in Touloumne county.

The moral question involved is this: Should the government make a profit on handling the product of an American producer? Would it be fair to the government to buy wheat at 67 cents a bushel and sell it to the American consumer at \$1.37 a bushel (the value of an ounce of silver is 67 cents)?

Such a thing is incomprehensible and yet that is what the government is doing and has for weeks been doing with silver.

FOOT-FIRE CHECKED

BY A. P. NIGHT WIRE

ELV (Minn.) May 14.—Aided by last night's light rain, guards have brought the Stony River forest fire under control. Ranger Tom Denyer reported to the fire headquarters today. Nine small fires were located in this vicinity over the weekend.

DAUGHERTY MAY LEAVE CABINET

Will Not Manage Harding's Presidential Campaign

Ill Health Given as Cause of Change in Plans

Successor in Political Ring Not Determined

BY ARTHUR SEARS HENNING (EXCLUSIVE DISPATCH)

WASHINGTON, May 14.—That Atty.-Gen. Daugherty will not manage President Harding's campaign for renomination and may resign from the Cabinet at no distant date on account of ill health is the understanding of Republican leaders who participated in a series of political meetings up the Mexican border.

European immigrants were finding easy access to this country through Chicago yesterday.

Within the last nine months, Secretary Davis said, more than 40,000 Mexicans have entered the United States, most of them finding work in the coal fields.

"We met B. E. Kube later, fully dressed, over the former's bedchamber and found him in bed.

"We came to a group of women all in their night gowns and barefooted, stumbling along, weeping, across the stones, and being prodded by rifles. The women were Miss Lucy, Mrs. Alice, Mrs. John D. Rockefeller, Jr., Miss McFadden, her travelling companion, and their maid, Miss Stromberg, who had remained with them.

"We came to some donkeys grazing on the roadside and the bandits beat them.

"The boy and carried him for a considerable distance on his back.

PRODDED WITH RIFLES

Finally we came to a group of women all in their night gowns and barefooted, stumbling along, weeping, across the stones, and being prodded by rifles. The women were Miss Lucy, Mrs. Alice, Mrs. John D. Rockefeller, Jr., Miss McFadden, her travelling companion, and their maid, Miss Stromberg, who had remained with them.

John McGraw Believes in a Lively Hitting Contest

FANS LONG ON PUNCH AT BAT

McGraw Declares Slugging Game is Best
Cites as Example Opener at Philadelphia

Has Words of Praise for Projector Scott

BY JOHN J. McGRAW,
Manager World's Champion Giants.
I have been led to understand in my long experience in baseball that the majority of fans love the punch at the bat of their home team. Well, didn't the Phillies have a swell in our opening game with them in Philadelphia? They sure did, and I had a headache from watching that great bat-tossing rally in the second inning.

Safe safe hits off my star southpaw, Arthur Nehf, whom I had depended on to hold the Phillies safe, and two home runs mixed in with a salvo of triples, were enough to give any manager a "sickness."

I take considerable pride, however, in the fact that two of the best players on the team, Jonnard and Scott, choked off that sensational bunch of hits. Jonnard did excellent work, especially so when it was taken into consideration that he was a newcomer in the big places. It was his control that pulled that out by his boot straps.

SMACKS SINGLE

Then when I inserted Earl Smith in the line-up as a pinch hitter in the seventh inning with the bases full and the score tied 1-1, he hit a single, consider that the real turning point of the contest.

With Jonnard out I felt that I must have a second victim, and I was not disappointed, again getting the ball over. I chose Jack Scott, I must give him credit for pitching a splendid game. My readers will agree with me I think when I write them that C. Williams, who had made four straight safe hits previously, was putty in Scott's hands.

Williams was the batter most feared by me, and I took pains to see that C. wouldn't get the ball over.

Walker, another man I did manage to get a single, was safe on the ninth, which with Dennehy's somewhat of a scratch double to short left finally resulted in a run that tied us up. If Stengel, though, had followed signals to play a closer field, that double would not have been made.

WE'RE SATISFIED

Now did not all that big crowd of intensely excited spectators get full satisfaction outside of the fact that their favorites were beat? I think so and want to think so, for I always feel that, painless or not, every game we play before get

PRINCE PROVES A GOOD SCOUT

Heir Apparent Praised the
American Golfers

Quimet Declares Royal Lad
is a "Knockout"

"Long" Jim Barnes on His
Way to England

BY PATTERSON MCNUTT
BY CABLE—EXCLUSIVE DISPATCH
LONDON, May 14.—The Prince of Wales received the American golf team at St. James Palace today. The prince, who is a great fan of the Yankee golfer, was best described by Quimet as "a knockout," said Francis.

The Prince received a man in

informal dress and showed an expert's knowledge of golfing matters. When he first entered the room he crossed immediately to Quimet and said: "You are winning the St. George vase." He turned then to Sweetser without awaiting an introduction and said: "You are doing a great job in winning the American championship this year. I congratulate you on your achievement."

He then spoke to Willing and complimented the victor on being runner-up in the St. George vase competition. After shaking hands with the entire team he remained a few minutes to chat about golf in general and then made his exit

LIVE OAKS CLUB OUT WITH DEFI

Live Oaks Tennis Club racketeers scored such a decisive victory over the Pasadena club players in a two-day tournament which concluded Sunday that they have issued a challenge through Dr. Albert Supple to the Whittier Tennis Club for a championship tussle for possession of the B. H. Dyan trophy. Live Oaks won from Pasadena, twelve matches to six. Herb Hahn's defeat of Fred Houser, 8-6, 7-5, 8-6, was easily the outstanding feature of the tourney.

While the members of the team were agreeing with Quimet that His Royal Highness was a "knockout."

NEW YORK, May 14.—The rear guard of America's invading golfers will set out tomorrow when Long Jim Barnes of Peabody and John Farnell of Quaker Ridge sail on the Berengaria for England, whence they will journey to Troon, Scotland, to take part in the British open championship next month. The departure of Barnes and Farnell completes America's complement in the British classic. On the other side they will join hands with Hagen, Sarazen, and Bradley Hafford, all of whom sailed several weeks ago.

LIFE CELLS DISCUSSED

Perfect Body Can Be Constructed If Person Aids
Nature, Says Barclay Sevens in Health Talk

ARTICLE XLVII

BY BARCLAY L. SEVERNS
In order for the life cells to increase, you must place within their reach the necessary elements for their growth. They will select from the elements those which are most appropriate. There are fourteen elements needed in the body of the human being to maintain health. If only ten or twelve or even thirteen of these are supplied, the body will be sick. That is why millions of persons are sick today.

The elements needed to build nervous centers and gray matter to make the perfect man or woman must be within the reach of the life-cells, or there is going to be suffering.

The human mind is a collection of nervous centers, composed of the gray matter concentrated from the life cells. In vegetation there is no center, there is no mind. In lower animal life there is a primitive mind. In man a greater number of these centers coalesce to produce a highly developed mind.

BEGINNING OF LIFE
Perhaps you will understand the beginning of life, if we take from the mixture of four elements and "something else." That "something else" is the brain of the cell. It would seem then that bringing these four elements together would originate brain.

You cannot, however, create the elements that start life; but you can bring the four elements together in the right form and life begins. A power we know nothing about made the elements and it was the purpose of this power that when these elements come together life begins. This power is so great that we cannot grasp its meaning.

The human body is made of the earth, sun, and supreme power. The man who has these elements has no reason why he should not be able to build a perfect body. It can be built if you supply the necessary materials, but it cannot be built if you supply the body lacking in some of the basic elements.

SUN SUPPLIES VIM

The sun supplies all the nervous and electrical vitality needed by the body, and, therefore, we should see to it that we receive our supply of this life energy. Flower growers would not try to raise flowers without the sun, and the wise will never shut all the sunshine out from their bodies. Be as zealous in demanding air and sunshine for your body, as the florist is in demanding it for his flowers, and you will thrive.

The average man that owns horses and dogs gives more attention to their health than to his own. He takes care of them so that they will not become sick, instead of doctoring them after getting sick; but he often neglects himself until illness comes. He eats for the body's sake, and eats too much of one kind and not enough of another, while the intelligent florist or cattle grower supplies the right kind and right amount of food to produce good plants or animals.

Humanity at present has the intelligence and mental development to find out what is best for it; why does it not do it?

TEST EVERYTHING

Over five hundred million dollars are spent every month in this country for things that are injurious, useless and wasteful, real enemies of the mind and body, real destroyers of the life cells. This has made us do the right cost of living. Those that raise the prices and thereby increase their incomes simply take advantage of the crude minds of the people with whom they deal.

The average person if he has good health never thinks about it. His motto is, "let well enough alone." Why worry about your health as long as it is all right? This is well as far as possible, but he should know that unless he takes the proper care of himself by keeping the cell life of his body in good condition, it will not be long before he will be laid up for some repairs.

Firms that want to make a superior article know that they must test everything that goes into its manufacture. Anything that does not pass the test is rejected. Is the same care given to the building of the body? No. Anything is used and, as the result, it soon breaks down so that in many cases it cannot be rebuilt.

(To be continued.)

—It Doesn't
Hammer
Pistons Down
—this non-detonating gasoline

There are two ways in which gasolines explode.

One explodes instantaneously—detonates. It hammers the piston down by a single, crashing blow.

It has a tendency to explode prematurely, thus reducing compression in your cylinders and delivering less power.

Detonation frequently causes "knocking," which you notice particularly on hills. The smashing blows increase vibration—which means more wear and tear.

The Sustained Thrust

Union Non-Detonating Gasoline explodes in a different way.

The explosion is progressive and prolonged. It thrusts pistons down, delivering power throughout the entire stroke.

It permits increased

compression because compression is limited by the tendency of a gasoline to detonate. All authorities know that.

And increased compression means increased power and efficiency.

Hill-Climbing "Gas"

With Union Non-Detonating Gasoline you'll note a new "lift" on hills and no "knocking" due to gasoline.

There's new speed on the level and a swifter rush in the pickup.

Sustained impulse reduces vibration—saves wear and tear.

There's higher efficiency and more mileage, therefore, in a gasoline like this.

Union Non-Detonating Gasoline is the product of progressive refining methods. Its quality is governed by exhaustive tests. The research of able chemists, equipped with the finest facilities for studying refining methods, is constantly devoted to its improvement.

Odds Against California in Championships

BRUINS READY TO HIKE EAST

Christie is Banking on a Thirty-Point Team

Will Depend a Great Deal on Field Events

Bears Have but Fair Chance to Gather Title

BY WILLIAM P. LEISER

(EXCLUSIVE DISPATCH) SAN FRANCISCO, May 14.—Costa Walter, Christie and his University of California field team, with two track stars as well, leave this morning for the national meet at the L.C.A.A. at Philadelphia, with Philadelphia with the Bear coach considers only a "fair chance" of winning another national title.

The Blue and Gold athletes have won the national title in track with them at Boston last season, and in their place there are but two candidates, Saxy, a quarter-mile runner, and a high jumper. These two have no great possibilities in the way of points, though they may come through if the starters' field is not too strong. Saxy, if he is in top form with the 440, is capable of about 50 seconds, but the races he has won this year have been through the breaks past Philadelphia. He will have to beat a field of fast men through 250 yards of sprinting before he can gain the pole, which reduces the possibility of breaks. His arm has had less of a strain of natural speed, and if he can stand up through several heats he should not go pointless.

UNABLE TO PLACE

Becker was unable to place in the P.A.A. meet two weeks ago. He is not in the fast field, including Leistner, Falk, and Boys of Stanford, and the former Harvard hurdler, Krogness, who took the points. The entrants at the L.C.A.A. will have a strong field, and Becker has a fair chance of breaking into it.

But the Bears look to the field and not to the track for a victory. Though there were more capable runners with them last season, a big portion of the winning point total was gained by the Bears, in which they are the best, and as strong as last, the great work of Neufeldt, making up for the loss of Jack Merchant. Furthermore, the great stars, although brilliant, will not be there to cut down their points in shot and discus.

Neufeldt's marks in shot, discus and javelin, at 44 feet 4 inches, 137, and 149, respectively, look quite as good as any turned in in the East this spring, and this gentleman promises to be one of the best putts with the ball in his hand.

He is probably the only entrant with a fair chance for three first places. "Red" Norris won the pole vault last season, from a field fully as strong as the which he will enter at Philadelphia. Norris has not done too well this spring, but the terrible concrete sliding pit at Berkeley is probably to blame. He should do stronger in the East.

IS ON A PAR

Five Bears with the team have made better than 125 feet in the discus this season, Neufeldt, Berger, Witter, Lane and Muller. Witter is almost on a par with Neufeldt, and Lane and Muller and Matthews may go as far as 44 feet. In the two events the Bruins should get somewhere around six-tenths of a point.

All three of the javelin throwers with Christie's outfit are clearly in the money, with Sorrenti and Neufeldt over 190 feet already, and the third, Muller, is not far behind. Muller and Treyer are good at least 6 feet in the high jump, though it is doubtful whether anything more than 6 feet 2 inches can place at all. Muller should make 6 feet 3 inches.

Boren is the great hope in the broad jump, with his combination of distance and style, and with his mark of 23 feet 2 inches of the P.A.A. meet. Treyer and "Mac Gook," as Muller styles himself, can make 22 feet 6 inches if this will win any points.

PURNER LEAVES FOR SAN FRANCISCO POST

BY A. P. NIGHT WIRE

DEL MONTE, May 14.—Fred A. Purner, sports and advertising manager, for nearly four years at Del Monte, has resigned from his position and will locate in San Francisco. Purner has directed the California State golf championships, the polo championships, the football and basketball teams, and other big Del Monte events. Purner was a San Francisco newspaper man.

WILLIE RITCHIE TO FIGHT COMEBACK

BY A. P. NIGHT WIRE

SAN FRANCISCO, May 14.—Willie Ritchie, former lightweight champion of the world, announced tonight he would essay a "come-back" in the pugilistic world and would challenge Dennis Leonard, the titleholder. Since his retirement, from the ring nearly eight years ago, Ritchie has been in business in San Francisco. He has been a successful businessman, and a Ritchie lost the lightweight championship to Freddie Welsh in a twenty-round fight in London in July 1911. He was the champion November 1912 by defeating Ad Wolgast. Ritchie came into fame prominence at Los Angeles in 1911 when, suddenly taken ill, he stayed through twenty rounds with Freddie Welsh, the English lightweight.

GREB RELEASED FROM HOSPITAL IN EAST

BY A. P. NIGHT WIRE

PITTSBURG (Pa.), May 14.—Harry Greb, former American light heavyweight champion boxer, was discharged from Mercy Hospital late today and left immediately for New York, the city where his manager, James Mason, has been conferring with promoters on the question of bouts with Mike McGehee and with Will Wilson, who is recovering in the hospital, recovering from an operation.

SPORT SHRAPNEL

BY HARRY A. WILLIAMS.

PREXY FLAYS BIG FIVE CLUBS

(Continued from First Page)

bumped into a batch of bad breaks Sunday.

Portland impresses one as a club which probably will place in the first division.

Jimmy Middleton may not have been born to be a baseball league, but he has some of the best. No better game has been seen here than that unfurled by Vernon. Also, that bunch has been the ball buster.

Jones, their leading hitter, was in a decided slump here.

It is a young ball club, with

the exception of Middleton.

Ostendorf, Day and Zeidler.

The Beavers are somewhat lacking in polish, but are potential.

Portland may regret losing

Sorrells, the San Luis Obispo.

He was sent there on a thirty-

day trial. That is, he must

make good in that time. Ted

Middleton, in the direction

when in his first game he

was matched with May and

brought Vernon to a whisper.

Vernon, like some other clubs, seems to need a bit more pitching. Jackie May has

shown his 1922 form in only nine games, but he has not

had his old-time smoothness, and the ball has

not slipped past the batter and snapped into the catcher's mitt with the same old bang.

His arm has had less of a

tough, whip-like quality.

Jackie has impressed one as

working much harder into

his delivery, but with this

added effort he seemed to

fall short of the zip of last

year. The result is sudden improvement.

In his last game he was

seen as good as ever. He

seemed to have really started.

But he has not been able to

keep him off. However, that happens to the best of them up

there, and the next week or two

may see a reversion to his

better form.

Marty Krug also has been

somewhat up against it for

pitchers. Hughes, Ponder and Lyons were the best in the field in which they are the best, and

as strong as last, the great work of

Neufeldt, making up for the loss

of Jack Merchant. Furthermore,

the great stars, although brilliant,

will not be there to cut down

their points in shot and discus.

Lefty Thomas has loomed

up against the best of the Angel

sluggers. Begins to look as

though this might be his big

year. Some would say he has

been the recognized bad-luck

champion. The jinx was

thought to have departed

away from him until he

was seen in fits.

Sargent made chief

of California men

(Continued from First Page)

DET. MONTE, May 17.—Homer

Eckberg, a crack trap shot of

Pasadena, was elected high chief

of the California Indians at a

meeting of that organization here

today.

Del Monte was selected for the

1928 national meet set for the

second week in May.

At the pow-wow which closed

yesterday, L. S. Hawhurst of San

Francisco won the shooting champion

ship and H. J. Lin, San Jose,

the golf tournament.

DARCY DISQUALIFIED

(Continued from First Page)

BRIDGEPORT, (Conn.) May 14.—

Lou Bogash was awarded a technical knockout over Jimmy Darcy of California in the third round of a scheduled twelve-round bout

yesterday. Darcy was disqualified

when he was down to take a

count without being hit.

**ESPEE REPORTS
GREATEST YEAR**

**Net Operating Revenue
Shows 20 Per Cent Gain**

**Increased, Efficiency Said to
be Big Factor**

**Strikes and Rate Regulation
Adverse Features**

Efficient operation of its extensive transcontinental system in the face of abnormal obstacles, is told in the income account of the Southern Pacific Company, released yesterday as part of the thirty-ninth annual report. A total net income of \$22,600,150.7 is shown, which is the equivalent of \$9.47 on the outstanding capital stock, compared with \$8.93 for stock, in 1921.

The improvement in net operating results of \$11,932,610.5, or 20.86 per cent, may be attributed principally to increased efficiency of operation, and partly through better relations established with employees, Chairman Julius Kruttschnitt said in the report. Operating revenue decreased \$6,975,194 as the result of the reduction of rates by the Interstate Commerce Commission, and new wage rates for shopmen and other employees, lower prices for many fuel oil, and other audiences combined to reduce operating expenses \$18,907,806.41. However, the betterment in operating expenses was lost through the production and strike expenses, the actual decrease amounting to \$16,350.00.

Chairman Kruttschnitt's comments upon the action of the Interstate Commerce Commission in lowering the freight rates in anticipation of a larger volume of business arising out of the strike. He says that "the reduction was based upon a speculation as to a revival of business which did not materialize as evidenced by the property investment of the principal railroads of the country during the year 1922, notwithstanding a return of 6.75 per cent on the value of money held for and used in transportation service was prescribed by the Interstate Commerce Commission to be a fair return after March 1, 1922."

The net revenue from railway operations of the company for the year totaled \$65,854.13, "which exceeded the record year of 1917," the report says, "but was \$4,514,954 less than that year, which was the last of strike management before the roads were taken over by the government."

INCREASED VOLUME

"The prospect of increased volume of business," the report continues, "is encouraging and will justify the continued development of improved facilities if checked by reasonable reductions of rates required by governmental agencies."

The report points out that as a result of the strike, its volume remained loyal, the company was able to maintain adequate transportation service during the strike, but the strike situation delayed the return of cars, which increased the company's difficulties in providing sufficient equipment to move the traffic. The strike cost was about \$2,500,000.

Had the reductions in expenses not been taken by the public through rate reductions, the return of the property would have been increased from 4.29 per cent to 5.80 per cent, the report says, or slightly above the return fixed by the Interstate Commerce Commission under the mandate of the Transportation Act of 1920, as fair and reasonable.

It is noted by the report that by more than 50 per cent and by steamship lines through the canal are discussed by the report as factors unfavorably affecting the revenue of the company. On this competitive basis, "Inroads upon revenue continue to be made by the competition of motor vehicles upon parallel highways, which are principally maintained by taxes, and the railroads contribute a substantial part, after a large expenditure for the construction by the Federal and State governments. The railroads and other taxpayers should be relieved of this unjust burden by requiring adequate payment for the maintenance of these highways by those who use them commercially in competition with the railroads, that is, for common carrier purposes."

CANAL COMPETITION

"Without reducing rates at any intermediate points, the Interstate Commerce Commission has recognized that your Southern Pacific steamship lines are entitled to equal opportunity with steamship lines operating through the Canal, and that no intermediate compensation should be made between points of origin and destination served by the Canal steamship lines which merely meet their competition and permit you to enjoy a share of the traffic that would otherwise move through the Canal (principles for which your officers have consistently contended), a large amount is expected to obtain such additional relief from the commission as will facilitate the recovery of a reasonable share of the traffic."

Results of transportation operations of the rail and water lines of the company for 1922 in comparison with the previous five years are as follows:

Operating revenues: 1922, \$262,519,169; 1921, \$269,494,364; 1920, \$282,269,504; 1919, \$239,621,271; 1918, \$221,611,206; 1917, \$191,914,460.

Operating expenses: 1922, \$193,644,456; 1921, \$212,572,262; 1920, \$242,113,790; 1919, \$183,885; 1918, \$182,721,372; 1917, \$120,601,823.

Net revenue from railway operations: 1922, \$68,554,713; 1921, \$56,932,103; 1920, \$40,155,714; 1919, \$47,272,160; 1918, \$35,888; 1917, \$47,369,667.

Operating Ratio per cent: 1922, 72.77; 1921, 78.81; 1920, 83.77; 1919, 78.61; 1918, 78.42; 1917, 61.12.

DAILY TRADE TALK

High-Voltage Transmission and its Relation to the Prosperity of California

D. T. Babcock, resident partner of Blyth, Witter & Co., runs high most of the time regardless of grades, road conditions or traffic. Intermediate and low gears cut very little figure in his scheme of things, whether he is on the "orange line" or the "orange line" in the balance when the big boss of the local office was in a hurry to get home.

Everyone but Mr. Babcock said it was natural that the talk yesterday should settle normally into a discussion of the 220,000-volt line he had been working on.

"The success of high-voltage transmission is peculiar to California. Here the power sites which furnish light and power for the great cities are far apart in the mountains hundreds of miles from the great power markets in the East and other parts of the United States. The sources of power are comparatively near great cities.

"It is an impossibility to transmit electricity at low voltage over long distance because of the great cost of insulation required, and it was because of this condition that California engineers for the last twenty years have been continually thinking about the solution of high-voltage transmission.

In this respect California always has led the world, and each successive year has made further progress.

So far the Japanese market has not been officially but indications are the prices will be some 15 per cent higher than they were a year ago at this time.

Taxes

THE total Federal, State, County and City tax bill of Los Angeles Gas and Electric Corporation for 1922 was \$75,000—nearly a million.

Like all other costs of doing business, this amount was derived from the only source of income available to the Corporation. That source is the money paid by our patrons for gas and electric service.

Stated differently, every 3-dollar gas or electric bill included an allowance of 25 cents for taxes.

This is one of

Grain Traders Are Friendly to Bull Party

EXCLUSIVE DISPATCH. CHICAGO, May 14.—Wheat trading in the grain market was with the bulls on the lead, the grain strength was in May wheat and a much more friendly feeling toward the buying side led to a strong rally, with the number of buyers on top, and when wheat got the higher, with May having a 10-cent advance and June 9 1/2, oats were 7 1/2¢ lower.

It was not until oats started to break that day when showed signs of weakness. July sold up 1 1/2¢, only to drop to when general market developments, and the market was caught on the way down, but under 1 1/2¢ there was active buying in commercial houses as non-local orders, which absorbed the surplus in the pit. Liquidation was more severe than yesterday.

May wheat acted strong throughout the day with houses with southwestern connections buying early, and at the middle the price was off only 1¢ from Saturday's closing. Toward the last hour, however, the market turned around and closed 1 1/2¢ with the total at the top and the market July against 1 1/2¢ over Saturday. Liverpool closed unchanged to bid higher. A decrease of 2,677,000 bushels in visible supply attracted attention yesterday, which was somewhat less than yesterday.

Local traders were inclined in the buying side

of corn and, while there was a sharp break at

one time in supply with oats, the decision was

not final, but the market had been bid higher.

July, widening the difference to 1¢ at the last

against May premium for May last week.

Demand for cash corn was less active and the

market 10 1/2¢ lower as compared with May.

Forwards, with 2,700,000 bushels to visible

supply was somewhat larger than expected.

A house with Omaha connections attempted to sell 100,000 bushels of wheat, but was not successful. Wheat from the early high. Numerous stop-loss orders were caught on the way down and unsettled all grain.

The break was down to lack of agreement between the market and the market.

July 10¢ lower as compared with May. Receipts

107 cars. Weather conditions were favorable

for new crop. May acted solid and while

breaking with other grains at one time turned

upward in the last. Houses with eastern connec-

tions were

against export sales, with a carry-over to New

market for July shipment. No 2 on track sat at

10¢ over May.

COTTON PRICES SWING, UPWARD FOR GAINS

EXCLUSIVE DISPATCH.

NEW YORK, May 14.—Firmness of undertones and an upward

swing of prices for the general

contract has featured dealings in

today's cotton market. The

initial level, which was at an ad-

vance of 15 to 20 points, subse-

quently proved to be about the

lowest of the day. Covering of

short commitments by large New

York and western operators fur-

nished the best support that came

into the market and continued

throughout practically the entire

day.

Opening higher, the market met

scattered offerings from Wall

street, local and spot interests,

while commission-houses, Liver-

pool, Japan and the South were

also buyers. After the small

liquidation, the list moved upward,

short covering advancing the

level to a 31 to 60-point net gain.

Scattered profit taking at this

level caused a 20-point setback,

which was quickly regained upon

publication of bullish consumption

figures and weather news, and re-

newed covering enabled the

tone to continue steady and the

market closed with net gains of

47 to 97 points to new crop months

holding about 15-cent gains while

May and June gains near 1 cent.

The close of the active

months was just under the high.

Spot advances, 26 1/2 for midweek

and Southern market; Gal-

veston, 25 1/2, 90 points advance;

New Orleans, 25 1/2, 100 points ad-

vance; Atlanta, 25 1/2, 100 points ad-

vance; Memphis, 25 1/2, unchanged;

Houston, 26, 90 points advance;

Little Rock, 25 1/2, unchanged.

Opening and the opening, high, low and clos-

ing quotations:

mer, 12¢; winter, 12¢; Cans, 12¢; Car-

boys, 12¢; Motor oil, 12¢; Gasoline

SETBACK SEEN IN SECURITIES

Liquidating Period in Grains Sets In

Confidence Among Holders Has Been Shaken

General Unloading on Part of Speculators Cited

BY CHARLES D. MICHAELS

EXCLUSIVE DISPATCH

CHICAGO, May 14.—A liquidating period is on in grain securities and cotton, with sentiment largely favoring lower prices on the theory that these have been a setback in business and that grains, commodities, securities and cotton have all the advance they are entitled to.

In the face of these depressing conditions which have intimidated holders into unloading everything and checked new speculative buying, values held up remarkably well the last week. There has been a decline of 10 to 12 1/2 cents in wheat, 4 1/4 to 7 1/2 cents in corn, and 14 1/2 cents in cotton from the high point of the season.

Government interference in business has been an important factor in disturbing confidence among holders, especially in cotton, and when the latter are scared their operations have a depressing influence on values.

Under all these adverse conditions with the all seas toward the lowest levels on the present down-trend, net losses in wheat for the week were only 1 1/2 to 2 1/4, while corn fell 1 1/4 to 2 1/4, and cotton, the latter on September, and the former in May, while oats are off 5 1/2 to 1 1/2 cents and rye 2 3/4 to 2 1/2 with May leading.

CONFIDENCE LACKING

There is a lack of confidence among holders in general, who are especially interested in investors, which may take some time to restore and create sufficient new buying and prevent further decline in the value of grain.

Judging from the heavy selling of wheat last week, the bulk of the big lines held by speculators in the East are throughout the country now, and a large share of interest created. Crop reports are somewhat better, and it is natural with mottos and a little advertising. Brought in the soft winter wheat States, each of the Mississippi River has been partially broken, and there has been a good deal of rain in Kansas, Nebraska, Oklahoma and Texas.

Those who are predicting lower prices for wheat claim that values must drop to 10 cents, while America can successfully compete with Canada and Argentine wheat in foreign markets. On the present low level, crop is good, and the west of the Missouri River will get less than \$1 a bushel for their wheat, which does not argue well for prosperity.

POOR PROFITS

There is nothing to be gained by the business, manufacturing and shipping interests in the States having lower agricultural products than pay little or no profit to the producers, as they furnish over 40 per cent of the buying power of the country.

Wages are being advanced and overhead costs increased in nearly all lines, yet the farmer is expected to take his hit, pay his taxes and pay high labor costs in compensation with wages paid by industries. It is not fair to expect lower prices for the farmer and higher wages for the consumer.

The government has made its first step in its effort to prevent recklessly speculating, having called for a half dozen years on the subject of grain futures since the 1st inst. It is well informed as to the volume of speculative business in the grain market, with the Revenue Department. Whether the supervision of grain trading will curtail business to a great extent is yet to be determined. A few strong men in the grain trade think that its effect will not be important.

COLORADO LIONS

The Effort to Eradicate Them Called a Success

Mountain lion eradication has been a success in Colorado, according to reports received recently by the Biological Survey, particularly along the Arkansas River, between Canon City and Salida, and in the vicinity of Eagle and Hot Sulphur Springs. Effective hunting was accomplished in the Horns Fly section west of Montrose, in the neighborhood of Spring Creek Ranch, and also on the sheep drives into Utah and the Big Horn Wash northwest of Frutes. The use of oil of camphor in the latter locality has proved very effective in luring bobcats into trap snares. A policy that has been effectively followed out in Colorado has been that of cleaning up wolf packs. Notable instances of this were the efforts of the Denver, Piceance, Fruta and Thatcher, and northwest of Whitewater. There was excellent co-operation between the inspectors of Colorado and the Colorado and the Colorado, both in taking wolves which ranged between these States. Stockmen have learned that they may call the Denver office of the Biological Survey for assistance when wolves appear on a range and start destroying livestock.

A total of 1729 predatory animals was taken during 1922 and 1923. The total number included three bears, 1607 cougars, nineteen wolves, fifty-five bobcats, twelve mountain lions, and thirty-three coyotes. There were also 204 badgers and other animals killed, making a grand total of 1932 animals caught during the year.

This does not include great numbers of smaller animals which attended poisoning campaigns which have been conducted.—[Bulletin of the United States Department of Agriculture.]

Under all these adverse conditions with the all seas toward the lowest levels on the present down-trend, net losses in wheat for the week were only 1 1/2 to 2 1/4, while corn fell 1 1/4 to 2 1/4, and cotton, the latter on September, and the former in May, while oats are off 5 1/2 to 1 1/2 cents and rye 2 3/4 to 2 1/2 with May leading.

CONFIDENCE LACKING

There is a lack of confidence among holders in general, who are especially interested in investors, which may take some time to restore and create sufficient new buying and prevent further decline in the value of grain.

Judging from the heavy selling of wheat last week, the bulk of the big lines held by speculators in the East are throughout the country now, and a large share of interest created. Crop reports are somewhat better, and it is natural with mottos and a little advertising.

M. Lucas, now a member of the United States Naval Hospital at Yokohama and is being attended to by Surgeon-Commander U. R. Williams, chief of the hospital. In the opinion of physicians that he will recover, but that he will have to remain confined to his room for at least a month.

As soon as he is well enough to converse with his friends, Lucas although yet in great pain, smilingly said that he sincerely believed that he was the lucky man having him to tell through the crisis that occurred when he was scalded.

"I should like to know who got the scald of his hand," he said with a twinkle in his eye, "because if it had not been for him and his precious beverage, I would most probably be deep down in the mud and mud cove of the ocean, instead of in a Yokohama hospital."

Those who are predicting lower prices for wheat claim that values must drop to 10 cents, while America can successfully compete with Canada and Argentine wheat in foreign markets. On the present low level, crop is good, and the west of the Missouri River will get less than \$1 a bushel for their wheat, which does not argue well for prosperity.

SENSATIONAL CHARGES MADE IN JAIL EXPOSE

**Dismissal of Manning and Couts
First Step in Sweeping
Clean-up by Traeger**

(Continued from First Page)

Sights from the jail kitchen, as he tested the food, showed that it was not fit to eat. He paid Manning \$500 prior to April 9, 1922, but on advice from my attorney, Richard Kittlette, I refused to pay him any more. The Sheriff's charges against Manning as filed with the Civil Service Commission are as follows:

"I have been informed by Mark Bailey, now chief jailer of Los Angeles, that he was suspended before in charge of the identification bureau of said county, that on or about the 27th day of March, 1922, you offered a bribe to the said Mark Bailey of \$500 if he would deliver over to you to be destroyed the identifying finger prints of one Herbert Wilson, who at that time was in the possession of the said Mark Bailey, being one of the records of the said identification bureau, and being evidence tending to connect the said Herbert Wilson with the commission of a public offense.

"After a careful consideration and investigation of the statements of the said Mark Bailey, I have been obliged to give it full credence.

"For the further reason, also, that while in charge of the Bureau of Criminal Investigation of the office of the Sheriff of Los Angeles county, you have sought to procure others to destroy and suppress evidence, and made false statements to the facts in connection with criminal investigation and prosecution."

The letters, notifying Manning and Couts of their dismissal, follow:

A. L. Manning, Esq.,
Sheriff's Office, Los Angeles
County, Los Angeles, Cal.
Dear Sirs: I hereby suspend you
without pay from the position of
superintendent of criminal division
of said county, on or about the 24th
instant, because you have not merited
the trust and confidence I placed in
you. I have been informed by Mark
Bailey, now chief jailer of Los Angeles,
and before in charge of the
identification Bureau of said county,
that on or about the 27th day of March, 1922,
you offered a bribe to the said
Mark Bailey of \$500 if he would
deliver over to you to be destroyed,
the identifying finger prints of one

Herbert Wilson, which finger prints
were then and there in the pos-
session of the said Mark Bailey, being
one of the records of the said Identifi-
cation Bureau and being evidence
tending to connect the said Herbert
Wilson with the commission of a
public offense. After a careful
consideration and investigation
of the statement of Mr. Bailey, I
have been obliged to give it full credence.

For the further reason, also, that
while in charge of the Bureau of
Criminal Investigation of the office
of the Sheriff of Los Angeles
county, you have sought to
procure others to destroy and
suppress evidence, and made false
statements to the facts in connection
with criminal investigation and
prosecution."

The letters, notifying Manning and
Couts of their dismissal, follow:

WILLIAM L. TRAEGER,
Sheriff, Los Angeles County, Los
Angeles, Cal.

Dear Sir: I hereby suspend you
without pay from the position of
superintendent of criminal division
of said county, on or about the 27th
day of March, 1922, because you
have not merited the trust and
confidence I placed in you and are
not a suitable person for that position.
My reason for this proposed
action is as follows:

"After the officers had ob-
tained that money," said Wilson,
"they decided that I would have to
be put out of the way. For that
purpose they framed the escape
and then I was to be destroyed.
The deputy sheriff lay in wait around
the jail and in the courtrooms of
the Hall of Justice waiting for me.
Cox, Edith Couts, and all the
guards here were released from the jail
by Roy Rankin, a turkey to whom
I had given \$1000.

"After this officers saw our way to
liberty through the bars near the
courtrooms. It was planned to have
me go first so that I might be shot
down. I was hit in the head, but I
couldn't crawl through the sawed
bars and O'Brien went first. He
was hit by two rounds of rifle fire
from Mark Bailey and then by
Deputy Sheriff Frank J. Albitz with
Manning. When Manning learned
that I had escaped the Sheriff to have me tried
and I had been released from the jail
upon which I was convicted
was framed and that Cox committed
suicide."

Second "Silent Night"
Madison Quartet, Revival
Singers, Visit

Composer Gives Own Songs
as Pianolouges

BY BEN A. MARKSON
The second "Silent Night" in
the Los Angeles district was ob-
served last night, K.H.J. The
time, however, only the regular
program.

On the noon program were the Den-
sopolitan Quartet and Stella Den-
sopolitan. Taylor, composed of
Vivian Graves, first soprano,
Alice Lewis, second soprano,
Alice Gilbert, second alto, and
Alice Gilbert, second alto, is en-
gaged in evangelistic work, with
headquarters in Chicago.

SPIRITUALS RENDERED

The four are singing every
night this week at the First
Church of the Nazarene, 10th
and Spring streets. Through the courtesy of
Rev. Mr. Harding, Rev. Mr.
Harding's revival week is con-
cerned mainly to religious songs.

The quartet is remarkably well-
balanced. The singers have splen-
did voices. Among the songs they
sang were "Heaven is My
Home," "Go Down Moses," a new
spiritual, "Wondrous Cross,"
"I'm a Mite," and another selec-
tion, "Get a Transfix."

Other models, \$45 to
\$775.

Convenient Terms.

TRIBUNAL'S AUTHORITY IS DEFINED

Small Claims Court Given Jurisdiction in Other Than Minor Collection Cases

The constitutionality of the
Small Claims Court as a tribunal
in actions other than those insti-
tuted for the collection of minor
sums, **so far as upheld in an opinion**
handed down yesterday by the
State Supreme Court.

Chief Justice Wilbur, writer of
the opinion, reversed a recent
decision of the Superior Court of
the Second District Court of Ap-
peal in the case of F. R. Leuschen,
petitioner for a writ of prohibition
against the Small Claims Court.

The Small Claims Court was
established by an act of the State
Assembly, which provided that the
court should be informal without set
pleading upon the part of lawyers.

"It is scandal they want," said
Deputy Couts. "They're framed me,
I'll put up a battle and tell all I
know. I'll tell all I know about
the Los Angeles case I acted in good
faith, and was under the impression
that she could lead me to the
hiding place of Clara Phillips."

The woman, who has been
confined in the County Jail on a
petitioin for a writ of habeas corpus,
signed an affidavit admitting
marriage to Raymond Padden, which
Mrs. Padden intends using in
the trial of her husband's divorce
suit.

Deputy Couts read from his
daily report on the days in question
his investigation of Mrs. Phillips' flight,
which tended to show that she had
left the County Jail on April 12, 1922,
and believed that she knew the location
of the hammer murderer.

Couts, who was one of the cap-
tors of Herbert Wilson, Herbert
Bailey and James O'Brien, left
for Toledo, O., to appear in
the Federal Court there as a witness
against O'Brien. On his return,
he said, he will take up the
trial for his reinstatement.

Every Picture Tells a Story

You Ought To Feel Fine in May!

But You Can't Be Happy When Every Day Brings Nagging

Backache, and Finds You Tired, Weak and

All Worn Out.

a single day. When the kidneys weaken and fail to properly filter the blood, the whole system is poisoned. Your back aches, you are lame and stiff and suffer rheumatic pains and distressing urinary irregularities; your head aches, you are dizzy, and feel tired, nervous, irritable and depressed.

Don't wait for some more serious kidney trouble. Get back your health while you can. Delay may mean dropsy, gravel, or fatal Bright's disease. Begin using Doan's Kidney Pills today! Doan's have helped thousands. They should help you. Ask your neighbor!

"Use Doan's," Say These Los Angeles Folks:

Albert Faison, 3011 Morgan Ave., says:

"My kidneys acted too often and I had to get

out of bed and sit up. I was very weak and

had to sit up all day. Doan's helped me

and I am now well again. Doan's have

helped me to get out of the trouble. They

have given any thought to your kidneys?

Mrs. A. Alvarado, 1506 Mission Road, says:

"I couldn't rest at night and got up mornings

with such severe pains in the small of my back that I could hardly move around. I was nervous, dizzy and my eyes were puffed and itched. My kidneys were irregular in action. I used Doan's and they cured me."

Statement given October 9, 1923.

On January 15, 1923, Mrs. Alvarado said:

"The cure Doan's made has stood the test of time and I am glad to recommend them a

second time."

Albert Faison, 3011 Morgan Ave., says:

"My kidneys acted too often and I had to

get out of bed and sit up. I was very weak and

had to sit up all day. Doan's helped me

and I am now well again. Doan's have

helped me to get out of the trouble. They

have given any thought to your kidneys?

PARTING BUT HOPEFUL

The tenor of the news dispatches would indicate that the gulf between France and England is much wider and deeper than the English Channel. There is virtually nothing, however, that cannot be spanned.

OUR GREATEST ASSET

The Union Pacific is planning for the expenditure of something like \$17,000,000 in and around Los Angeles and a lot of this will be for the purpose of fully connecting up with the business of the harbor. Even the railway men grasp the idea that the harbor is the biggest thing we have.

STRIKES IN GERMANY

Prisoners in a German jail have gone on a strike. They are demanding sun bath every day and the right to smoke at all hours. They also want an allowance of 100 marks a day and toothpicks with their meals. If they don't get what they want they threaten to leave the place and take all their business to some other jail. The authorities are said to be very much worried about the matter. The strikers are giving the jail a black eye.

STRENGTH OF UNITY

The American citizens should have more faith and less criticism in his attitude toward his party and his country. This is the declaration of Postmaster-General New in his annual public speech. The nation is not doing as badly as some of our safety experts assert. Neither is there any need for the various blocks or groups that are surviving for class legislation in Congress. The administration can be relied upon to work for the whole country and not for any set division thereof. United we should stand.

NATIONAL PROSPERITY

The chairman of the Republican National Committee admits that the present prosperity of the country is due to the benign influence of the existing Republican administration. Over his own signature he declares that there is no other explanation of the marvelous improvement of conditions in the nation except the fact that during the past two years a constructive administration has been in charge at Washington. It has vigorously prosecuted a program of public economy, tax reduction and recuperative legislation. Of course, it will be said that it is the business of Chairman Adams to make just these claims, but in this case the fellow is in a position to substantiate the statements. McKinley was acclaimed as the advance agent of prosperity. President Harding is something more. He delivers the goods.

HAVING THE BEST OF IT

Eastern contractors express the opinion that the present construction boom will fatten out in less than three years and the depression may come sooner than that as a result of the buyers' strike. This is because of the advance in cost of most building materials and the increased demands of labor. Many lumbermen and dealers in other building supplies as well as union workers are acting on the theory that prosperity is a rush order and they must get theirs now. It is the demands of this class that will hurt construction operations. We have almost caught up on the building shortage resulting from the war. Once the actual needs of the people are supplied and every man finds a roof over his head the business of home-building will take a slump. New York started the year with a building boom that burst all boundaries and defied comparison. But the demands of labor and the increase in building materials exercise a depressing effect and the construction permits are reported as running much lighter with each succeeding month. With free labor and a great lumber market at the harbor we are in a better position for a sustained constructive program than any other American city.

IT IS UP TO AMERICA

Our distinguished Secretary of State insists that the participation of Uncle Sam in maintaining a Court of International Justice does not constitute a political entanglement. Political platforms themselves have defined it as an American policy and as a forbidden ensnarement. Those who would treat it as something foreign to our institutions would have to rewrite American history. Safeguarded as the court machinery would be it would be virtually impossible for any nation or even any alliance to control or dominate it. No plan or project on behalf of the peace of the world can be suggested which does not include the establishment of such a court within its scope. The court is essential even for the disposal of its own controversies. Existing means of arbitration are found incompetent. Some process for the judicial adjustment of international disputes has become imperative. This can alone be furnished by a Court of International Justice. There can be no such tribunal in full efficiency that is not sanctioned by and participated in by the United States of America. That is the concrete conclusion of the alert and patriotic mind of Secretary Hughes. It carries convincing force.

COSTLY DEADLOCK

If the attitude of Gov. Hunt and others in Arizona should seriously delay ratification of the Colorado River pact, now agreed to by six of the seven States concerned, it will prove a costly deadlock. All the States will suffer loss by the delay and Arizona's losses will not be the least.

With political and engineering and economic viewpoints the Colorado River project, with its magnificent opportunities for enriching the Southwest and building up its industries, requires concerted action by all the States of the Southwest.

The States are interdependent in an undertaking of this kind and also require the co-operation of the Federal government.

Secretary Hoover, representing the national government, has succeeded with the State members of the Colorado River Commission in framing a sound working agreement and this pact has been ratified by each of the States except Arizona. Not one of the States could get all that its representatives might desire in framing the pact, but by assenting to the theory of eminent engineers that the controlled river can provide all the water that can be put to reasonable and practical use the members of the commission were able to come to a satisfactory agreement.

A group of Arizona men has for the time blocked progress, in spite of the fact that there is a tremendously strong pro-pact sentiment in that State. Opposition to the pact in Arizona appears to be based on the fear that Arizona will not get all that some of its citizens would like to have.

It would almost seem that some of the ardent men in Arizona are seeking to blood river development in co-operation in order that they may undertake the task of building dams for itself alone. If that is their position it can only result in a deadlock by which everybody will lose.

A deadlock is indeed already established if the report is true that Secretary Hoover has declared that Arizona cannot get permission for its \$20,000,000 Diamond Creek dam project until the pact is ratified and that Gov. Hunt has countered with the declaration that Arizona will not ratify until the permit is granted. Whether or not this is the situation, it is true that, considering the interstate and international complications of the project as a whole, not Arizona nor any other State can succeed in accomplishing anything single-handed.

If the Federal Power Commission should grant a permit for the Diamond Creek enterprise after the pact is ratified the project would use water in accordance with apportionment under the pact. If the permit should be granted before ratification the water would be used from the general river flow in which all the States have an interest. Such use of water without an interstate agreement would certainly meet with objection by other States. Litigation and controversy would ensue and the whole question of Colorado River control would be embroiled and handicapped.

That Gov. Hunt's attitude is shortsighted is indicated by a statement attributed to him that he could not see any reason why Arizona should help develop power in Arizona to be used in Los Angeles.

Such an attitude is ridiculous when viewed in the light of statements made by Arthur P. Davis, director of the United States Reclamation Service, during a recent trip West. Mr. Davis told of the early enthusiasm by engineers. He told of their growing enthusiasm for the project of harnessing the great river when they found the project feasible and comparatively simple.

Even at that time, many years ago, engineers could see only one obstacle in the way of undertaking the work. "We could not see," said Mr. Davis, "a market for power big enough to warrant such a huge undertaking. The whole project, magnificent and attractive as it was and is, seemed hopeless for that one reason alone." Now, Mr. Davis says, Los Angeles has grown to such an extent and has built up its industry so that a market is waiting and the project is justified from every point of view.

Gov. Hunt ought to know that the biggest dam in the world and the most magnificent power plant that could be built are worthless if the power generated cannot be marketed. The Colorado River project requires the co-operation of all the States, and of the Federal government. Some States have the land through which the river flows. Some lands can use the water for irrigation and some communities can buy the power.

No single phase of the project could succeed in itself. No single State can take advantage of all the possibilities. By working together under an agreement such as is provided by the pact framed by Mr. Hoover's Colorado River Commission all concerned can bring about a development that will benefit every community in the Southwest.

It is doubtful whether the citizens of Arizona will support a policy that leads blindly to a deadlock and which would rob Arizona of its share of the magnificent Colorado River heritage just as surely as it will rob other States of their share.

BIG BUSINESS

The successful completion of the raisin growers' drive to sign 5% per cent of the acreage for the association means much for California, for grape growing has become one of our leading sources for the production of wealth.

There is now in California over 1,000 square miles of growing grapes, or enough to make a belt a mile wide and extending from Los Angeles to a point 200 miles east of El Paso or a belt of the same width extending from San Francisco to Seattle; a belt 200 feet wide with a greater length than the distance around the world.

For the rear 1921 the tonnage of wine and table grapes shipped from the State was enough to fill over 30,000 cars, and in the same year over 145,000 tons of raisins were made.

The value of the 1920 crop of grapes in California was about \$20,000,000. Although the grape is produced largely in the central part of the State, it can be grown in nearly all of the counties, having a much wider range of growth than has the orange. In respect to early ripening the section around the Imperial Valley has the advantage, with Texas and Arizona only as rivals.

Land suitable for the growing of grapes has for hundreds of years had a high value and the value seems to be continually going up. Adams Smith, in his "Wealth of Nations," published in 1776, mentions the grape land of France as an example of high-priced land; when the book was reprinted many years later the editor noted the fact that the value of grape land as given by Smith was much below the pres-

Uncle Sam: "I Expect You to Conquer the Beast Next December"

(Projected by George Matthew Adams)

ent price. Judging by some of the quoted returns made by California vineyards in the past few years and the retail price of the fresh fruit and raisins, the owner of a good plot of grape land is on the way to making a fortune.

Grapes are grown in many of the States of the Union, but California is far in the lead, having almost a complete monopoly of the production of raisins and certain varieties of wine and table grapes. However, we have not as yet reached the refinement in care of grapes that European countries have. In Germany the vineyard owners along the Rhine objected to the change of the level of the water for the improvement of navigation, on the ground that the grapes were dependent on the light reflected from the water at a certain stage of depth.

WHEN A MAN'S HONEST

The head of a bonding company announces that fat men are much more honest than thin ones. This idea is arrived at after scrutinizing the records of his company regarding those who have succumbed to temptation after they had been bonded. Few of the jolly fat folk are found in this unhappy category. Perhaps the reason is that a gentleman of considerable avordupois cannot make his escape with such speed and expedition as the leanly built ones.

The fair-haired, fair-skinned races also reflect a higher standard of honesty than the dashing brunettes. And married men are far more honest than the bachelors. In fact, the bonding expert declares the only way a man past extreme youth can square himself with his company is to take unto himself a wife. Marriage acts as an inhibition against theft, the man naturally hesitating to bring disgrace on his family, where he might run the risk regarding himself. Then, too, years of failure in this unhappy category. Perhaps the reason is that a gentleman of considerable avordupois cannot make his escape with such speed and expedition as the leanly built ones.

The advancing price of sugar has been made a market with his "touch." The fake oil promoters are something like it.

The advancing price of sugar

is to argue that the report of the death of all fruit from the frost was somewhat exaggerated.

The cost of living in this country is constantly advancing, but when we consider what life is across the seas it is worth all it costs.

There are indications that the American game of baseball is about to oust cricket as a national game in England. My word! Let us have a cup of tea.

The advancing price of sugar

is to argue that the report of the death of all fruit from the frost was somewhat exaggerated.

The defense of our American institutions lies not in the fact that they are ancient, nor that they were created by the founders of our country, but in the fact that they are good and necessary; because they are superior to any of the substitutes that the radicals have been able to offer.

But by far the most pleasing announcement is the one about women. The fair sex, it is declared, is much more honest than the men. Few women betray a business trust or walk off with funds not their own. Some have lost, others have won; the majority has had a fair run for its money. And those who think they have been defrauded in any way can always appeal to the State Corporation Department.

swarming of the oil sharks. The State Corporation Department has endeavored to keep out these gentry from California. The last provisions in the Bromley bill furnish a fine weapon for that purpose.

So many sudden and stupendous fortunes have been made in California oil, of which the public have been kept informed, and so many small fortunes have been lost in wild speculation that nobody in particular has heard about, that a stampede of irresponsible promoters to these happy hunting grounds would have been inevitable had not the State Corporation Department kept the situation well in hand.

As it is, there has been no orgy of lost and wasted savings, no widespread looting of the innocent in the California oil boom, on the old magnificence scale generally accompanying oil and mining excitements. Some have lost, others have won; the majority has had a fair run for its money. And those who think they have been defrauded in any way can always appeal to the State Corporation Department.

Of Interest to Women.

THE LAST WORD.

BY ALMA WHITAKER

The Sexless Appeal

Wynham, you may have noticed, is rather strong on "sex appeal." And in masculine tradition romance and the sex appeal are inseparable. Naturally, Right.

For this is a general exaggeration, a lie. An exaltation of a minor thing. Making mountains out of mole hills, building up a fact. But that would be right.

But it were a good exaggeration, an interesting lie, a wholesome, happy farfetched. But it is just—

—a nasty trick, lacking in subtlety.

But it is a happy sign of the times that our more blatant, crude girl shows which once ruled the boards of the theater, statue and now relegated to Main street. That "sex appeal stuff" has to be put with ever-increasing tact and finesse. Especially when there is any attempt to cater to intelligence.

The world is getting wiser, it is mighty sick of something, and it doesn't care what. Film stars still think it wants more sex appeal.

But some of us think it is crying out for sexless appeal. Here's hoping, for its own sake.

For nothing does Zeigfeld call his troupe of fair, but sexy maidens "Follies." When he thought of that it was one of his most lucid intervals.

But you will have gathered that "sex appeal" is vitally important to the directors. An article in a frisky magazine, recently devoted to analyzing the "sex appeal" of the various stars, male and female. And it was upon this basis that the author conceded their rating.

But the author has "decidedly destined to greatness, those with lesser appealing advantages fell behind."

And all the while a Los Angeles woman artist was painting a remarkable picture. It was exhibited here, but we didn't know. We were not attuned to its greatness. We were not even aware of its existence. Londoners, however, exhibited that same picture in New York, where "sex appeal" is old stuff, and it was seen by the critics, the newspapers—devoted columnists, and the like.

Ad European quidnuncs lavished unstinted praise upon it.

Why? Because she had painted an astonishing psychological study of the "Cosmopolitan's Daughter."

Fred Hogue told the Ebell Club about it one day last week. The Ebell Club art section could appreciate the picture. It wished he had appreciated the picture itself—on its own instincts. But it took a man to understand, to point the moral of that picture. It was, he said, a picture of a girl in a cowboy boots, a capable, efficient, modern girl, whose face breathed strength of character, poise, knowledge, a little hard, perhaps, yet a woman with no thought of "sex appeal" in her whole constitution.

A modern, young woman who could look any man in the eye and hold him. A girl who could be a girl who could be "comrade" a plenty, but neither a "pretty lady" nor a Madonna. And her friend minded his head when women of the "sex" type, and the Madonna type. No man could have painted that.

Loren Barton picture, he said.

But, you see, men can understand and appreciate such a picture.

It is men who have filled the columns of New York newspapers with stories of new artists.

Paris and London who are enthusiastic about its charms and technique.

And at the same time, we find some articles cropping up, especially in European magazines, appertaining to this new type of woman. When the antiphopper vogues, on sexual matters, was rushed into print to insist that growing up beside the flap was an eminently desirable type of girl who met them joyously and fondly as an old friend.

Even Elinor Glyn, who rather specialized in sexy heroines, has obviously been confronted with this type. She wrote a story about them, but she didn't understand.

She concluded they were lacking in sex appeal because they couldn't help it, and her inspiration was to help us so much in our housekeeping.

Mary Louise. Q. What will clean white kid shoes?

Discovery of San Francisco Bay by Portola

LYING securely hidden behind its Golden Gate, San Francisco Bay defied discovery by sea for more than two centuries. Don Gaspar de Portola, commanding an overland expedition in search of the supposedly wonderful harbor of Monterey, discovered San Francisco Bay, November 5th, 1769.

His first view from the brow of a high hill was spectacular. The bay was named in honor of St. Francis, the patron saint of the Franciscan fathers.

San Francisco, one of the most historically interesting of American cities, is the birthplace of the Bank of Italy—the nation's chief exponent of statewide branch banking.

HOUSEHOLD SUGGESTIONS

Ready for Service Again

If the glove fastener tears out of the glove, darn the hole and sew an ordinary dress snap close to the old fastener.

Carpentry

When driving nails or screws into hard wood, always rub them with soap; they will then go in easily without splitting the wood.

A Hot Hot-Water Bag

Fill the hot-water bag only half full and then press all the air out before screwing on the top. The bag will stay hot much longer and be less cumbersome to handle.

Save the Paper

The paper ribbon that comes from the ribbon on a bolt is splendid to use for the feed bag on the sewing machine when sewing on sheer material or lace. It prevents puckering and is easily torn away.

Then They Will Not Tear

When sewing pockets on children's suits or rompers, set them low enough so that the hands cannot reach to the bottom of the pocket. Then the hands cannot be pushed so far into them as to tear them off.

Elevate the Chopping Bowl

The most attractive pieces are a most attractive fruit bowl out of an ordinary wooden chopping bowl with the aid of shellac and varicolored paints.

To Fringe a Skirt

When sewing pockets on children's suits or rompers, set them low enough so that the hands cannot reach to the bottom of the pocket. Then the hands cannot be pushed so far into them as to tear them off.

G. E. W. Question: I have a brown leather covered parlor set. Can you tell me how to clean it?

Answer: Use a cloth dipped in a mixture of equal parts of ammonia and water.

A. Both silver lace and gold lace are cleaned by being boiled in a solution of one cup of salt to one quart of water for a few minutes, dried thoroughly, then sponged with a piece of white velvet dipped in alcohol. I should suggest that the silver cloth could be treated in the same manner.

Mr. Carson likes his wife's COOKING

Mr. Carson is distinctly a home man. He "likes his wife's cooking," as the phrase goes, and he is always generous with his compliments. This particular evening he was especially appreciative of the Coffee.

"I don't wonder that they call it The Universal Drink," he said thoughtfully. "Just think! While you and I are seated here tonight drinking our Coffee together, millions of other men and women in every section of the country are doing the same thing. Think of the cheer and added enjoyment that Coffee brings to the table of all those people! Why, it is almost indispensable!"

Mrs. Carson nodded. "I had never thought of that before, but you are right. Isn't it wonderful, too, to know that no family is so poor that it cannot afford Coffee? It is to me. I think of it every time I make up my order. Of all the things I buy, there is nothing that brings as much real, wholesome enjoyment at such small cost as Coffee."

SIX RULES FOR MAKING BETTER COFFEE

- 1—Keep your Coffee fresh
- 2—Measure carefully
- 3—Use grounds only once
- 4—Don't boil your Coffee
- 5—Serve at once
- 6—Scour the Coffee-pot

COFFEE the universal drink

The plasters of São Paulo, Brazil, who produce more than half of all the Coffee used in the United States, are conducting this educational advertising campaign in co-operation with the leading Coffee merchants of the United States.

Joint Coffee Trade Publicity Committee
64 Water Street, New York

IN THESE first warm days of early summer, when it is verily a labor of love to prepare things in a hot kitchen, the housewife finds the Elite delicacy shop a great convenience.

Here may be procured 'most any' kind of cooked meat, cold or hot, fine imported cheeses, sauces and relishes, and delicious fruit and vegetable salads, with salad dressings put up under our own seal.

Among the imported delicacies are such rare treats as filets of anchovies in sweet olive oil from France, peeled muscat grapes from Spain—the finest ever found for salads—genuine Stilton Cheese from England, and India chutney from Calcutta.

LAND SWINDLE SUSPECT HELD

Jailed Canadian Said to Have
Victimized Scores

Impersonation of Dominion
Agent is Charged

Takings Believed to Total
More Than \$100,000

James M. Clark, 65 years of age, a distinguished-looking citizen of Canada, is held at the City Jail today, on a grand-larceny charge. His arrest, police say, concludes a man hunt in which authorities of two nations participated. It also ends the career of one of the cleverest international swindlers ever to operate in this country, police officials believe.

In his arrested operations in this country and Canada, it is believed to have obtained more than \$100,000 in the last few years. Numerous Argentines also are said to have victimized him, the architect of the appearance Canadian, according to police, posed as a Dominion government land agent and sold interests upon thousands of acres of land in the Snake River district of Canada which he did not own.

The trail of victims left by Clark in his wake is said to extend from Winnipeg, Canada, to Port Dodge, Iowa, then to San Francisco, Palo Alto, Seattle and British Columbia.

LONG MAN-HUNT ENDS

The suspect was arrested yesterday afternoon by Detective Lieutenant Lucas in a hotel at 188 North Main street. The arrest comes after an extensive investigation in which the Canadian authorities cooperated.

It is charged that Clark, masquerading as a Canadian government land agent, sold thousands of contracts for land in the Peace River Valley. Each contract, Lucas stated, was for \$40 acres at \$5 an acre. These contracts, the detective stated, were made effective by an initial payment of \$125. The remainder of the money was to be paid in installments to the government. After he received the initial payment, Lieutenant Lucas said, Clark would disappear and repeat the operation on some other town or city until the town in which he was then operating had been fairly well cleaned out of "sucker" money.

WANTED IN WINNIPEG

Letters and telegrams received by local police from F. C. Blair, secretary of immigration and colonization of Ottawa, W. W. Cory, Deputy Minister of the Interior at Ottawa, and Col. J. C. Marten, commissioner of provincial police at Winnipeg, state that Clark has never been employed by the Dominion government and is a denizen of the underworld and underworlds in the Peace River Valley.

The letter from Col. Marten

NOTABLES SAILING TO PORT

Weeks, Five Senators and Nineteen Congressmen
Will Arrive Monday for Two-Day Stay

When the Army transport U. S. Grant sails into San Diego Harbor Saturday morning from Panama, it will bring to Southern California an integral portion of the national government in the person of John W. Weeks, Secretary of War, nineteen Congressmen and many of their wives and relatives. From San Diego the party of notables will sail to Los Angeles Harbor, arriving here at 8 a.m. Monday morning. They will remain here until Tuesday evening, when they will sail to San Francisco. Elaborate plans for the entertainment of the party here have been made and a rousing welcome will be given the galaxy of notables when they arrive.

WIVES IN PARTY
Besides Secretary of War Weeks, Senator Francis E. Warren and wife, A. J. Jones and wife, William H. McKinley and niece, Miss Mattie J. T. Robinson, wife and child, E. F. Ladd and wife.

Senators Frank B. Kellogg and wife, D. R. Anthony, wife and daughter, William R. Wood and wife, Louis C. Cranston and wife, Gordon Lee, Martin B. Madden and wife, Percy E. Quin and wife,

stated further that the suspect had swindled scores of residents of Winnipeg in 1918 and that he was there to face numerous charges.

A list of names of 150 Los Angeles men and women who Clark, it is believed, victimized was planning to approach, was found in the suspect's possession when he was arrested.

Clark also has operated in Durango, Colorado, and Bellvue, Birmingham, Wash.; San Francisco, New Westminster, B. C.; Kansas City, Mo.; Spokane, and many other towns and cities, it is reported.

It is charged that Clark, masquerading as a Canadian government land agent, sold thousands of contracts for land in the Peace River Valley. Each contract, Lucas stated, was for \$40 acres at \$5 an acre. These contracts, the detective stated, were made effective by an initial payment of \$125. The remainder of the money was to be paid in installments to the government. After he received the initial payment, Lieutenant Lucas said, Clark would disappear and repeat the operation on some other town or city until the town in which he was then operating had been fairly well cleaned out of "sucker" money.

**YOUTH FATALLY
HURT; DEATH CAR
DRIVER SOUGHT**

Police today were seeking a truck driver who late yesterday afternoon ran down and fatally injured Howard Hopkins, 16 years of age, of 801 West Thirty-sixth Place. The boy was found lying unconscious in the street, at the intersection of Main and Twentieth streets.

He was removed to the Receiving Hospital by Charles W. Tabor or 1790 Sycamore street and Jack Burman of Concord street in the same neighborhood. The boy died at the hospital last night.

Physicians at the hospital stated the boy had sustained internal injuries and a skull fracture.

Doctors Francis Grusby and Murray have been assigned to locate the truck driver who is believed to have struck the boy and fled.

The letter from Col. Marten

VETERANS GO NORTH

G.A.R. Men of This District at Modesto Encampment

More than 100 members of the G.A.R. left Los Angeles at 9 a.m. yesterday on a special Southern Pacific train for Modesto to attend the annual State encampment of the veterans, opening today. Men from Los Angeles, Pasadena, Long Beach, Sawtelle and other Southern California cities are making the trip. Special cars were run from Pasadena and Long Beach to the Southern Pacific station for the delegations from those cities.

The special train stopped at Mojave for half an hour in order to make the usual stops in the delegation. Fresno was reached at 6:30 p.m., where the Woman's Relief Corps of that city served dinner at the Southern Pacific station.

**TWO ARE INJURED
AS CAR HITS AUTO**

Harry Churets of 1160 East Twenty-eighth street was thrown from his automobile by W. E. Elliott of 6125 Palm avenue, Maywood, suffered cuts of neck and face from broken glass when an inbound Whittier bus struck the automobile yesterday at Washington and Long Beach boulevards.

The victim was standing in front of the car which was in charge of Motorman R. E. Eberol. Both men received emergency treatment at the Receiving Hospital.

NEW POLISH BEAUTY FOR FILMS
Seeks New World to Conquer

**CINEMA IS
HELPED BY
INVENTION**

Cameraman Works Out
Attachment to Help Perfect Photography

Antonio Gaudio, veteran cinematographer, forwarded to the United States Patent Office yesterday

an invention which will be of vast service to the motion-picture industry. It is known as a magnification focusing telescope for camera attachment. Gaudio is perhaps one of the most famous cinematographers in motion pictures. He is now in New York, with the

Patent Office.

"I hope the American people will not think I am trying to imitate Pola Negri," Miss Nadina said yesterday at the Hollywood Hotel. "I am not. I am a Polish girl, and I am fond of the Polish folk dances. I am a huge bouquet of American beauty roses. 'I will let my work decide my merits, but I realize that I will have a lot of difficulties to overcome in a strange land."

Miss Nadina resembles the Negri type, although she is taller than her Polish predecessor. In a recent scene for foreign films, notably "Her Great Sacrifice," "Vengeance," and "An Ancient Queen," all of which are the translated works of the famous dancer, she was seen in a bigger field than Hollywood was the result. Miss Nadina expects to take "Babylon" to the Hollywood footlights in the near future.

Several offers already have been extended to the Polish beauty, but her first will probably be one to appear in a picture to be made by William P. S. Earle, who has just completed the film "Tut-Ankh-Amen."

**DAMAGE SUIT OF FILM
ACTRESS IS SETTLED**

The suit of Edna K. Hope Meyer, film actress, for \$20,000 damages against W. G. Stewart has been settled outside of court. It was dismissed.

The actress, who is 18 years of age and who has taken minor roles in Charlie Chaplin pictures, was injured recently when the automobile in which she was driving crashed into Stewart's machine, which was parked at the side of the road. Miss Meyer declared in her suit that she had been damaged. She asserted that the accident was due to negligence on Stewart's part in allowing the machine to remain on the side of the road without lights showing.

Attorney Wilbert C. Hamilton represented the actress.

After Every Party

In the walls you've been waiting for. The Columbian has pace, all the dresses dancing rhythmic in the world into their corners of waltzes.

**Barbara Worth
Filming Delayed
Until Next Fall**

The millions of Harold Bell Wright readers who have been awaiting the filming of "The Woman of Barbara Worth" by Transocean Pictures Corporation, will have to wait a few months longer. Sol Lesser, president of the organization, announces that due to research work necessary properly to the story, it will take time to many important details necessary before starting. It is decided to postpone filming until early in September.

However, the Wright fans will not be utterly disappointed, for with this announcement comes word that another Harold Bell Wright story will take its place in place. This is "When a Man's a Man," a story that has almost an equal number of sales.

And the characters cast for "Worth" were ideally suited to "When a Man's a Man." Florence Vidor and John Bowers will play the principal roles and the remaining cast is now being assembled.

Work is being rushed at top speed on the script and the company will leave shortly for Arizona, the location of almost all the author's works.

Harold Bell Wright has telephoned Mr. Lesser that he will be present at every manner on the filming of "When a Man's a Man" and that he already is making preparations to journey from his Tucson ranch to Prescott, where most of the episodes will be given to the screen.

Left: Barbara Worth, right: Harold Bell Wright.

**Kosloff Busy
in Three Films
at Same Time**

Theodore Kosloff is engaged at present in the task of staging three elaborate dance productions for three Paramount pictures simultaneously, and meanwhile personally rehearsing and appearing in several numbers in "Children of Jazz," in which he plays a featured role, under the direction of Jerome Storm.

Depicting the evolution of jazz from 1850 to 1922, with a change every ten or fifteen years, Kosloff is interpreting the various dances with ten feet. As a partner, Dashing as another, Kosloff rehearses three of his pupils in a spectacular interpretive dance of the French revolution, the symbolic figures representing "Liberty, Equality, Fraternity." This dance is staged for a Paramount production directed by Charles Maigne and featuring Leatrice Joy.

At the same time Kosloff has commenced the task of assembling a cast to call on location where several fight and rescue scenes in which he figures prominently in "Children of Jazz" are to be filmed this week.

Since early childhood, Miss Nadina has been before the footlights. Early scenes were dramatic offerings and light opera. Throughout Poland, she is said, she is noted for her beauty and dramatic power.

This is her first visit to California although several years ago she made a visit to New York. She has returned to Poland for a brief stay to join a repertory company which toured the principal cities of Europe. Miss Nadina speaks English fluently but with a decided accent.

"I hope the American people will not think I am trying to imitate Pola Negri," Miss Nadina said yesterday at the Hollywood Hotel. "I am not. I am a Polish girl, and I am fond of the Polish folk dances. I am a huge bouquet of American beauty roses. 'I will let my work decide my merits, but I realize that I will have a lot of difficulties to overcome in a strange land."

**GLADYS HAS
A NEW ROLE
IN LATEST**

Forsakes Flapper Parts
For Try at Dual Personal-
ity Story

Production has been started at Universal City on a Gladys Walton starring vehicle that promises to be one of the most interesting of her career.

The story is weird and different from anything that Miss Walton ever has done. Instead of being a flapper, she is a woman with two natures, a dual soul—one half evil and one half good.

The drama of the story is intensified by the fact that there are only four characters of importance—the woman, her Chinese servant, her sweetheart and a doctor, whose evil hypnotic influence over her is the cause of her lightening transformations from good to bad.

The Chinese servant woman will be played by Eta Leon and the doctor by John Sainsbury. The young lover will be played by Malcolm St. John.

EVERYONE LIKES IT

Seldoms does a play receive the commendation that has been accorded "The Woman of Bronze" in which Margaret Anglin is appearing at the Mason Operahouse. There have been many instances when certain critics have received endorsement in certain circles only to have other critics dispute the judgment. New York, for example, has often decided that a play was well written and splendidly acted, only to have other communities take the opposite view later on.

The Old Bear's Regret

"All things have changed," sighed the rich old party. "Formerly, my polite attentions were taken for granted. Now, however, the deceptions of love are for the deceptions of love."

FRIENDLY HANDS CLASP ACROSS BORDER

Film Folk and Others Show Their Good Will to Mexico

Scene at the Presentation of the Film

Left to right: Dr. Jose A. Samaniego, prominent Los Angeles Mexican citizen; Zach Lamar Cobb, Los Angeles attorney; Thomas G. Patten, western representative of Will Hays; Marshall Nellian, Goldwyn film director; Harry Chandler, Garza Leal, Mexican Consul, and Abraham Lehr, vice-president of the Goldwyn Pictures Corporation.

MOTION-PICTURE play

A "The Eternal Three," recently taken in Mexico by Marshal Nellian, Goldwyn film director, as part of a forthcoming picture and representing the whole-hearted cooperation of the Mexican government officials, was officially presented yesterday morning at the Culver City studios to Garza Leal, Mexican Consul, who received them on behalf of President Obregon, who will award them a place in his state library.

The presentation of this drama, which is said to be the first authentic picture taken with Mexican aid, marked the cementing of good will between the Mexican government and the American motion-picture industry.

Attending the ceremonies, which were held on a studio set, besides Mr. Nellian and Mr. Lehr, were Harry Chandler, who acted as master of ceremonies; Dr. Jose A. Samaniego, prominent Mexican citizen here and uncle of Ramon Navarro, motion-picture star; Zach Lamar Cobb, Los Angeles attorney; and Abraham Lehr, vice-president of the Goldwyn Pictures Corporation.

PICTURES NOTABLE

The pictures, which are scenes from "The Eternal Three," recently completed by Nellian, contain "shots" of prominent historical buildings in Mexico City, and the movie is to be a picture of the people, which are said to contain ruins and tombs in King Tut-ank-Amen's tomb in Egypt, the Juarez monument and other notable structures.

"If these pictures as part of "The Eternal Three," production," Mr. Nellian said, "will tend to give the world a clearer view of the earth, for the motion pictures goes everywhere, an idea of modern Mexico, with its up-to-the-minute facilities in cities and the wonderfully artistic buildings, that rival those of any foreign countries, its beautiful scenes, wealth, then will we in a small way be performing a act of service among the right way."

Mr. Kirkwood contested the suit denying all charges, and filed a copy of the agreement to which he consented to pay him \$225 a month pending the outcome of divorce proceedings. The wife asserted her husband earned \$150 a week.

The suit was withdrawn just before its trial, as it had been set for hearing in Judge Keetch's court to-day.

CO-OPERATION APPRECIATED

"The co-operation extended to American products," Mr. Nellian concluded. "We are in agreement in picturing Mexico as it really is, will be appreciated by everyone in the industry. Mexico offers a virgin field and with the help of the Mexican government, expressed by President Obregon toward American producers, the screens of American and the world will soon depict those things of which Mexicans are just

obtained.

By this invention all "doubles" on motion picture work can be lined up with positive assurance.

The son of the large magnification and the fact that the lens is not disturbed during the focusing and photographing periods.

The actress, who is 18 years of age and who has taken minor roles in Charlie Chaplin pictures, was injured recently when the automobile in which she was driving crashed into Stewart's machine, which was parked at the side of the road.

Miss Meyer declared in her suit that she had been damaged.

She asserted that the accident was due to negligence on Stewart's part in allowing the machine to remain on the side of the road without lights showing.

Attorney Wilbert C. Hamilton represented the actress.

Gland Patient Wins Race

With a nod and to their amazement onlookers saw a 72-year-old runner dash across the line winner of a 30-second running race in the sensational time of 6 seconds, just 4.6 of a second short of the world's record. This all most unbelievable incident occurred at the annual field meet held at one of California's State institutions.

It was another victory for Science, proving that the youthful vigor, stamina, ambition and power may be restored by reviving the vital glands of the body. The winner of the race was a gland patient.

Dr. Arnold Lorand says in his book, "Old Age Deferred," in speaking of the glands: "We must insist upon the fact that the glands are the body unchanged by age or disease, by means of extracts obtained from the similar organs of healthy young animals."

Science has now proposed such a plan to the country's leading labs in the form—Glandogen. This combines the healthy glands of young animals with other "efficiency" products. Hundreds of keen-eyed, vigorous men and women are today taking Glandogen.

Glandogen is obtainable at Chamber Drug Co., 1st and Broadway; Standard-Chamber Drug Co., 3rd Street and Broadway; Pharmacy Drug Stores, 9th and Spring, and 9th and Los Angeles.—Advertisement.

TO RELIEVE PAIN AND BACKACHE

Women May Depend upon Lydia E. Pinkham's Vegetable Compound

Minneapolis, Minn.—"I had heard so much about Lydia E. Pinkham's Vegetable Compound that when I realized I needed to take something to relieve my pains and backache, and to help build me up I began to take it. It has been sick off and on for years and barely weighed a hundred pounds, but had such good results that I am now having a bonding capacity of \$28,000.00.

"This entirely disregards the law of the State of New York, which to date has been our market, and which I have not yet been able to reach, and which we must consider, whether we like it or not.

MUST KEEP FAITH

"Every woman who values her health should be proud to have a true friend like the Vegetable Compound," says Mrs. W. E. Shaw, 3227 Walnut Street, Chicago, Illinois. "I had female trouble so badly that I could not stand on my feet. Half of my time was spent in bed, and pains in my back which were unbearable. I tried everything I could think of to help myself, and when a friend advised Lydia E. Pinkham's Vegetable Compound I began taking it at once. I recommend it without hesitation."

Corns

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezeon" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freezeon" for a few cents, sufficient to remove every hard corn, soft corn, or corns between the toes, and the calluses, without soreness or irritation. —[Advertisement]

Stubborn inflammations usually respond to Resinol

Although Resinol Ointment is primarily intended for the treatment of skin infections and the like, it has such a strong healing action that it is highly and widely recommended as a dressing for the most stubborn boils, sores, wounds, etc.

It is cold, soothing and does not smart or sting when applied. Many satisfied users testify that it has healed quickly and easily, sooner than have refused to turn to other treatments.

Sold by druggists.

For the treatment of Liver and Disease. We prescribe, remove the gallbladder, cure the liver, all cases, and the same time insure a strong and mental condition.

OPPORTUNITIES

Additional financing is often needed by successful concerns and they frequently prefer to get this capital from a man who can interest himself actively in the business.

That opening you have long been looking for may be waiting today in the "Business Chance" columns of the "Times Want Ads."

NONAGENARIAN HAS BIRTHDAY

Mrs. Lucy Prescott Vane

for the development of more power along the Owens River and the Aqueduct.

It has been the dream of John R. Haynes and his friends that with a \$25,000,000 power bond issue in the Los Angeles area, the city government and the Los Angeles Chamber of Commerce would then be in a position to go ahead and start its own plant at Boulder Canyon, which will be more than enough to complete until the estimated total of \$100,000,000 or more had been obtained from the Los Angeles taxpayers, which, under the Haynes plan, would be the Los Angeles City power monopoly.

The Council has approved the \$10,000,000 part of the plan for construction of the power development, and its approval to the \$25,000,000 for the Boulder Canyon project.

Councilman Mushet, chairman of the Public Service Committee, voted in favor of submitting the \$25,000,000 bond issue to the voters, as he said the people had the right to decide the question of issuing the bonds, but of the bond issue itself, he said that it would jeopardize the harbor and that it would be a good idea to wait for the city. He said:

CITIES STAND

"The remaining bonding capacity of the city is less than \$55,000,000. The bonded indebtedness of the city authorized but not issued is \$24,000,000.

"This includes sewers, \$12,500,000; harbor, \$2,500,000; library, \$2,000,000, a total of \$24,000,000.

"The Council has authorized the following bond issues to be submitted to the people on June 5, 1923:

"City, \$1,000,000 library, \$300,000; City Hall, \$7,500,000, which will be \$2,000,000 playgrounds, \$1,500,000; \$1,000,000, a total of \$26,500,000. This leaves a bonding capacity of \$28,000,000.

"This entirely disregards the law of the State of New York, which to date has been our market, and which we must consider, whether we like it or not.

"The Council has authorized the following bond issues to be submitted to the people on June 5, 1923:

"City, \$1,000,000 library, \$300,000;

"City Hall, \$7,500,000, which will be \$2,000,000 playgrounds, \$1,500,000;

"\$1,000,000, a total of \$26,500,000.

NEW CHIEF FOR VALLEY SCHOOL

Calexico Trustees Appoint Superintendent

Warm Weather Schedule Put Into Effect

Rancher is Convinced He Has Strawberry Record

EXCLUSIVE DISPATCH

CALEXICO, May 14.—Calexico school trustees have employed C. B. Collins as superintendent of the school system here, after considering several applications filed since the resignation of Sept. 1, J. A. Raitt. Mr. Collins has been head of the school system for five years and comes to Calexico from there with the highest recommendations from the Imperial school trustees. Previous to going to Imperial, Mr. Collins was superintendent of the Needles schools for seven years. He is a graduate of the University of Colorado and took a post-graduate course at the University of California. While the weather is warm weather, a daylight saving schedule was put into effect in the schools here by ordering the classes to convene at 8 o'clock in the morning earlier than during the winter months. School will close daily at 12:30. It was announced.

Considerable friction is said to exist between the Tulare school board and the elementary teachers, some of them threatening to quit unless the superintendent is removed. A petition signed by many prominent citizens requesting his resignation was presented to the board.

Ray is reported to have a four-year contract which will be renewed to him for another year. He has refused to consider demands of the board and refused to hand in his resignation. It is declared that he will not only disregard and neglecting his work to edit a local newspaper. It is understood that the suit, filed by the board to State Superintendent Wood, has been referred to Atty. Gen. Webb for his decision.

RATTLER FOUND IN PIPE

PORTERVILLE, May 14.—A well-camouflaged rattler in a well-camouflaged in Tulare county's latest "unusual" find. R. M. Beatty, foreman of the Dr. Beatty orange grove, near here, experienced difficulty in trying to start an engine. After several hours work he called a mechanic, who declared that there was something in the pipe. Beatty ran his hand into the pipe tank and felt something soft and slippery that made him jump out of the way. It proved to be a four-foot rattler that had been sucked up into the pipe by the engine.

He cleaned up the pipe and the engine started again. The rattler was not disturbed.

Six-months-old vines are producing heavily, according to Sutton.

Sutton said he was careful in cultivating the plants and used a small amount of fertilizer to hurry them along. He attributed the remarkable showing partially to the fact that he had been growing the vines in the open. It was almost without interruption since he planted the straw-berry vines.

WANT SERVICE IMPROVED

CALEXICO, May 14.—A serious business handicap is faced by small business men in this section, the Calexico Chamber of Commerce has appointed a committee to confer with officials of the Pacific Telephone and Telegraph Company to request installation of additional equipment in this district.

Members of the Chamber of Commerce told the directors at a meeting here that the company is hesitant to take on the responsibility of the telephone system of the San Joaquin Railroad Commission. It was announced at the meeting that the committee would first confer with the officials of the company and then, if satisfaction is not obtained, appeal to the Railroad Commission.

Business men here assert that their trade could be materially increased if the telephone system were extended in lines across the boundary to Mexicali and this is one of the questions that they want taken up with the telephone company.

Members of the Chamber of Commerce, however, declare that the Railroad Commission has no authority to build lines into foreign territory.

SUMMER HOURS IN EFFECT

MEXICALI, May 14.—Summer hours have gone into effect at the Mexican custom house. Official announcement today said that the custom house would be open at 8 a.m. and close at 1 p.m. daily.

Custom invoices will not be examined and passed after 1 o'clock, it was asserted by the customs inspectors.

Through orders issued by the head of the revenue department at Mexico City, the Mexican customs houses are all placed on summer schedule because of warm weather, which permits the officials and employees to have a few hours of relaxation during the heated part of the day.

Mexican Consul J. Martines at Calexico has announced that his office will be open from 8 a.m. to 1 p.m. a schedule that cuts two hours from the afternoon period.

Those desiring passports issued by other consular work are urged by the Consul to arrange for the service within the hours indicated.

NEW DIRECTORS CHOSEN

EL CENTRO, May 14.—Eleven of the 20 members of the El Centro Chamber of Commerce will be new to the work as the result of the annual election held here yesterday. R. H. Cary, James R. Ford, James E. Howard, R. P. Moore and C. W. Renn were re-elected to the board. New members are H. W. Brewer, Jr., J. S. Duff, Thomas Gill, Rodney Hermon, A. C. Johnson, Allen F. Noyes, Charles Stoen, Frank Stoen, Charles Sones, Percy C. Thacker and William A. Tondre.

The new board of directors will take office at the meeting of the Chamber of Commerce next Wednesday.

TO BUILD CLUBHOUSE

EL CENTRO, May 14.—The Imperial Valley Automobile Dealers' Association plans the construction of a summer clubhouse at Jacumba Springs, according to William L. Leslie, chairman of the building committee. The building has been donated to the association by B. L. Vaughn, proprietor of the springs. The building, which will be a balloon-baquet hall, will have billiard room and large porches, with practically everything necessary in a modern clubhouse.

Construction of the clubhouse will start within a few weeks, it was announced by the committee, so that it may be utilized by the members of the association for a time this summer. If it proves as popular as expected, the association plans to make use of the building for week-end parties throughout the year.

ANDREW F. POWER ARRESTED ON WARRANT, DECLARER BILL IS PAID

Andrew F. Power, manager for local development concern, was arrested from the State Labor Commission, based on a complaint of a former woman employee of the bureaus asserting that Power refused to pay her wages said to be due.

Power was confined in jail for several hours until he raised \$500 bail and obtained release. He established a sum of \$150 and said that the bill had been paid and that the charges were without merit.

SCHOOL FIGHT IS TAKEN TO STATE

Seek Wood's Aid in Ousting Superintendent

Tulare Board is Pressed by Elementary Teachers

Object to Education Head Editing Newspaper

TULARE, May 14.—The problem of ousting A. W. Ray, city Superintendent of Schools, from office has been submitted to Will C. Wood, State Superintendent of Public Instruction, for information and proceedings may be taken. This action is reported to have been taken by the newly-elected school board of Tulare as a result of a recent meeting in which Ray refused to resign when asked to do so by the board.

Considerable friction is said to exist between the Tulare school board and the elementary teachers, some of them threatening to quit unless the superintendent is removed. A petition signed by many prominent citizens requesting his resignation was presented to the board.

Ray is reported to have a four-year contract which will be renewed to him for another year. He has refused to consider demands of the board and refused to hand in his resignation.
